

AirIQ Complete Air Management packages for load leveling are factory assembled and tested for guaranteed performance. Our ready to bolt-on packages fix weight related rear squat, with options for side-to-side leveling and on-board air. Nothing rivals the ease and performance of AirIQ.

## AirIQ SD1

Our most affordable AirIQ solution with a Standard Duty compressor and single channel valving for control of both air springs together.

**Standard Duty Air Compressor**  
25% Duty Cycle  
2.03 CFM @ 0 psi

**Single Axis Control**  
Front to Rear

All AirIQ Load Leveling air management packages include universal frame mounting brackets and hardware, plumbing kit with 20ft of 1/4" tubing, weather sealed wiring harness, fuse holders and installation accessories

PN: 50-41100

## AirIQ SD2

Upgrade to independent corner control with dual channel valving to manage offset loads with ease.

**Standard Duty Air Compressor**  
25% Duty Cycle  
2.03 CFM @ 0 psi

**Dual Axis Control**  
Front to Rear +  
Side to Side

All AirIQ Load Leveling air management packages include universal frame mounting brackets and hardware, plumbing kit with 20ft of 1/4" tubing, weather sealed wiring harness, fuse holders and installation accessories

PN: 50-41200

## AirIQ HD2

Step up to a Heavy Duty compressor along with the dual channel valving for ultimate performance.

**Heavy Duty Air Compressor**  
33% Duty Cycle  
2.62 CFM @ 0 psi

**Dual Axis Control**  
Front to Rear +  
Side to Side

All AirIQ Load Leveling air management packages include universal frame mounting brackets and hardware, plumbing kit with 20ft of 1/4" tubing, weather sealed wiring harness, fuse holders and installation accessories

PN: 50-42200

**Make your AirIQ package refill in seconds, add a Boost Tank to any package.**

2-Gallon aluminum air tank is powder coated and includes easy frame mounting brackets and tank plumbing kit and can be used for on-board air.

PN: 50-10200

## The Future of Electronic Air Management is Here

AirIQ is based around an industry first, modular architecture that combines next-level technology and innovation providing a totally seamless user experience...

### Easy-to-Use App

The AirIQ Bluetooth App delivers user-friendly control of your air suspension and is available free for iOS and Android devices. The App yields precise adjustment of air pressures resulting in effortless height management with the ability to save up to 8 custom presets for different loads.

### Fully Upgradeable

The modular design of AirIQ can contain anywhere from 1-4 corner modules and can be customer upgraded at anytime. Never throw away to upgrade again...

### Smart Corner Modules

Each corner module contains OEM quality solenoid valves, an onboard precision pressure sensor, and a microprocessor running intelligent algorithms for accurate leveling.

## Key Features of the AirIQ Complete Compressor & Manifold Package.

- More intelligent pressure control
- Precision machined aluminum manifolds
- High flow solenoid valves for faster leveling
- Integrated BLE chip provides the best range & performance on the market
- Future proof software design with OTA (Over The Air) firmware updates

- AirIQ Management Packages use higher capacity, durable air compressors
- Faster & easier installation with 100% factory preassembled packages
- Pairs perfectly with ReadyAIR load leveling air springs for optimal results. Compatible with all helper bag brands.
